Battery Certification Checklist

A practical checklist for buyers importing or deploying battery systems across GCC, Middle East, UK/EU and selected international routes.

Document / check	Why it matters	Status
UN 38.3 transport test summary	Required for lithium battery transport and freight acceptance.	Pending / Ready
MSDS / SDS	Safety data sheet for handling, transport and storage.	Pending / Ready
IEC / CE / UKCA evidence	Supports destination compliance and buyer due diligence.	Pending / Ready
Serial traceability	Links cell, module, pack and warranty owner records.	Pending / Ready
Warranty file	Defines warranty owner, claim route, exclusions and service path.	Pending / Ready
Origin documents	Used for customs, route planning and supplier verification.	Pending / Ready
BMS / EMS / PCS compatibility	Confirms the system can integrate with site controls and grid interface.	Pending / Ready
Commissioning and handover pack	Needed before energisation and asset owner acceptance.	Pending / Ready
